

PORTAL FIELD

I developed Field Portal, a web-based platform designed to streamline the operations of field teams. This platform offers several key features:

- **Project Management:** Facilitates project assignments and tracking for field teams.
- **Payment Processing:** Supports weekly honor payments, ensuring timely and accurate disbursements.
- **Ticket Booking:** Allows users to book tickets for project briefings and other events.
- **Multi-User Functionality:** Includes a submission and approval workflow for team leaders, ensuring smooth oversight and decision-making processes.

Field Portal enhances efficiency and communication within field operations, making it a valuable tool for managing both personnel and logistics.
